

HÜCO® now as an independent brand in the TecDoc catalog

Since 1980 we have been selling our products under our well-known HÜCO Brand in the aftermarket. Following the acquisition of HÜCO by HITACHI in 2012, our products have been sold under both brands and are bundled in TecDoc with the supplier number 449.

From end of April on, our brand HÜCO will be visible in the TecDoc catalogue as a separate data supplier number. From this date onwards, HÜCO will be listed in the TecDoc catalogue under the **data supplier number 7851**.

To date, our product range under the HÜCO brand comprises around 3,000 items and we are committed to growing this for our customers in the future.

As a Premier Data Supplier in TecDoc, we are committed to providing data that meets the highest standards, a commitment that will be upheld under the HÜCO brand.

During the transition period the HÜCO products will be found under our Astemo data supplier number 449 and the new data supplier number 7851.

Moreover, our iconic TOKICO brand shock absorbers can be found within the TecDoc system under data supplier no. 6968.
