TOKICO Shock Absorbers

TOKICO Shock Absorbers

Astemo, the manufacturer of TOKICO products, was established in January 2021 as a new company through the merger of Hitachi Automotive Systems, Keihin, SHOWA, and Nissin Kogyo.

Since our establishment, our shock absorbers for 2-wheeled and 4-wheeled vehicles (mass production vehicles and aftermarket) have been highly evaluated by customers worldwide.

We have been pursuing high performance in all our products and pushing the limits of technology.

Our staff in the development, production, and quality sectors are working to create products that are of high quality and high functionality.

As part of this effort, we have supplied products to numerous races for both motorbikes and cars where every 1/1000 of a second counts, and our technical capabilities have been proven through activities that have led to title wins.

TOKICO shock absorbers, which integrate these technologies, are provided to customers from Astemo's worldwide service network with a sense of security and safety.

Manufacturing and sales company of TOKICO products: Astemo, Ltd.

How to read TOKICO No.

SP	S-plus (Performance)

How to Read Pictogram and Symbol mark

Pictogram

	Front		Oil
	Rear		Gas
R	Right		Performance shock
L	Left		OE number of ASSY

Symbol mark

	While stocks last		New items

*Please confirm the compatibility by not only Model name and model year, but also by OE reference number.

Product Line

01

Hydraulic Shock Absorber

1000 - 6000 Series (Oil type)

- OE equivalent quality
- Improved riding comfort under severe driving conditions, due to Tokico's unique rebound and compression control disc valve system which automatically adjusts to all ride conditions.
- Smooth operation and greater durability of the shock absorber.
- Improved road holding and necessary stability for safety.

Twin Tube Shock Absorber

02

E Series (Gas type)

- Originally developed by TOKICO (first in the world)
- Better vehicle control, improved ride quality, and quieter operation by eliminating cavitation.

03

Coil Over Type Shock Absorber

Q Series (Oil type) U Series (Gas type)

- Originally developed by TOKICO (first in the world: U series)
- Better vehicle control, improved ride quality, and quieter operation by eliminating cavitation.

Suspension Strut

A Series (Oil type)
B Series (Gas type)

- TOKICO suspension strut is designed to meet the growing demand of modern vehicles for tough bottoming resistance. More smooth and better riding control is assured by strut which is more and more widely used for up-to-date vehicles.
- Strut assembly is permanently sealed from the beginning.
- TOKICO prepares wide range of sealed strut of this kind.

Strut Cartridge

S Series (Oil type)

05

- The strut cartridges are the easiest and most efficient way to replace suspension strut with cartridges.
- Improved comfortable ride control under severe driving conditions, due to Tokico's unique rebound and compression control disc valve system which automatically adjusts all ride conditions.

06

Strut Cartridge

Z Series (Gas type)

- Assures a suitable damping force for active road-holding and excellent driving stability under any running condition.
- Reduces rolling and pitching of cars.
- Doubles effects of radial or wide tires when used in combination.
- Prevents nose dive at braking.
- Gives better road-holding when used together with gas shocks for rear.

* TOKICO put Kit(Shaft nut, rubber, washer) in the box automatically.

* TOKICO shock absorbers listed in this catalogue are dedicated to spare parts for aftermarket.

Cannot be taken warranty of Genuine part items from authorized car dealer. Please contact to the shop you bought the products.

How to Install Shocks

When replacing shock absorbers, please select the correct shocks from the application listing, and follow the instructions below.

When removing the used shock absorbers

- 1 Please check and remember the positions where each of the parts are currently installed. After installing new shocks, the fittings must be set back in the original position.
- 2 Please remove dirt and rust from screws by using a stiff brush.
- 3 Before removing the screws, please make sure to apply oil on to the rusted nuts & screws.
- 4 Please do not throw away the worn shock and the removed kits until installation of the new shocks is completed.

When installing the new shock absorbers

- 1 Before installation, please check the TOKICO number on the shock body, and compare it with the application listing, making sure the model year and fitting position, etc., are correct.
- 2 Please confirm that all the parts required for installation are included in the product package.
- 3 Please do not grab the piston rod, or damage it, with any type of metallic tool. Damaging a piston rod will ruin the rod seal, causing leakage.
- 4 When installing the "eye type", please do not tighten the nut when the car body is jacked-up. Please tighten the nut in the natural position.
- 5 In case of the bolt type, please follow the diagram printed on the plastic bag for the fitting kits or the mounting-kit listing.
- 6 When installing a cartridge, please follow this procedure:
 - (1) Remove the strut from the car body.
 - (2) Remove the gland nut and take the internal parts out of the strut housing.
 - (3) Remove the oil in the strut housing and clean the internal surfaces.
 - (4) Insert the new cartridge into the strut housing.
 - (5) Use the new gland nut contained in the box to fix the cartridge securely in place.
- 7 Make sure that all nuts and bolts are tightened securely.

When scrapping the used shock absorbers

- 1 Please take out the oil completely.
- 2 For gas shocks, please take out the gas and oil completely.
- 3 Follow your local regulation when throwing away old shock absorbers.

Prohibited Actions

Do not damage a piston rod like the below photographs, or it causes the oil leakage.

Do not compress a piston rod with upside down
(Keeping an eye on the oil seal not to pass through the rod stroke range).

Do not grab the surface of piston rod.

Do not use impact wrench. It will break a Shock absorber.

Requests for safe and comfortable use of TOKICO Shock Absorber products

Warning

- The replacement work should be done by a qualified factory personnel or technician.
- For maintenance, inspection, and replacement, follow the vehicle's owner manual and maintenance instructions.
- Check compatibility with the car model (year and designated part number) in the catalog.
- Before getting underneath the vehicle, make sure it is safe by using a vehicle lift or jack stands to support the vehicle firmly.
- The engine and other surfaces may be hot immediately after driving, so allow the vehicle to cool down prior to replacing the shocks.
- When retracting and removing the coil spring, always use a suitable spring compressor.
- Do not let the shock absorber hang or pull on by the brake hose or sensor harness, otherwise they may be damaged.
- Do not use an impact wrench to tighten the nut at the end of the rod. Use a torque wrench and be sure to tighten the nut to the specified torque.
- Do not carry out work or store the product in a place where there is a fire.
- After replacement, drive slowly and check that there is no abnormal noise due to under-tightening.
- If the brake's hydraulic lines were disconnected, be sure to bleed the air from the brake caliper after installation.
- When drilling a hole in the shock's main body, the oil, gas, chips, etc. may shoot out from the hole under pressure. Be sure to wear protective goggles and gloves, and use a drill etc. to slowly make a hole about 30 mm away from the bottom edge of the main body's outer casing.

Attention

- Do not use a tool to grip the piston rod, otherwise scratch marks will appear and damage the rod.
- Do not use parts that have been dropped or otherwise subjected to strong impact.
- Wear protective goggles and gloves when replacing parts, conducting an inspection, and maintenance.
- Be sure to remove any foreign matter from the sliding part of the rod, as it may degrade performance and lead to failure.
- After replacing parts, run them in until the performance stabilizes.
- If any rubber parts such as bushings, mounts, or dust boots are cracked, cut or otherwise damaged, replace them immediately.
- When replacing shocks, replace them on both sides as a set.
- After replacement, make sure that the wheel alignment is within specification.
- When disposing the product, make a hole in its main body to completely remove any gas or oil.
